WSUA PROGRESS REPORT

As of October 16, 1963, Radio Station WSUA would like to report that:

1) the transmitter is now re-designed and is performing satisfactorily under the very demanding broadcasting circumstances which the dormitories pose. There are still a few rooms in the dorms having occasional difficulty receiving the signal, but this unfortunately is not practically remediable because of the electrical conditions in the dorms.

2) the entire studio and record racks have been painted by the staff members.

3) the console has been electrically rebuilt by our chief engineer to give more facile and efficient operation.

4) the new tape recorder has proven its value already with just the Senate meeting recordings; the tape deck is to be installed in our console and will be ready for full operation.

5) a new, high-quality turntable is now in full operation in the studio.

6) a new walkie-talkie set has proven invaluable in testing.

7) every LP record that has been released by Columbia since last April will soon be catalogued and in our racks, along with several hundred other records which have just been ordered.

8) the $1,409 bill outstanding from last year has been settled and paid; with the cooperation of Dean D. Hartley, Mr. N. Brown and Mr. C. Stein, the invoice was reduced to $1,099; a savings of $310 from Senate's contingency funds.

9) the telephone was installed in the studio September 23.

10) installation of the air conditioning unit is pending action by the building superintendent.

11) a saturating publicity campaign is now in the offing.

12) an enthusiastic response from the students already has made it possible to increase our staff by 150%.

13) two commentaries have been introduced: "By Way of Comment", Mondays at 7:05 and "Know Your Senate", Thursdays at 10:45.

14) the classical selections of the day and the Special Events Broadcasts will be published daily in the Student Information Service Daily Bulletin.
